

# Airport Departure Analysis

Across LAX, MIA, and JFK(appendix)

By Ria

# Which Airports and Why

**JFK**

Northeastern Coast - Bad Reputation! 50 million passengers 2022

**MIA**

Southeastern Coast - 50.5 million passengers 2022

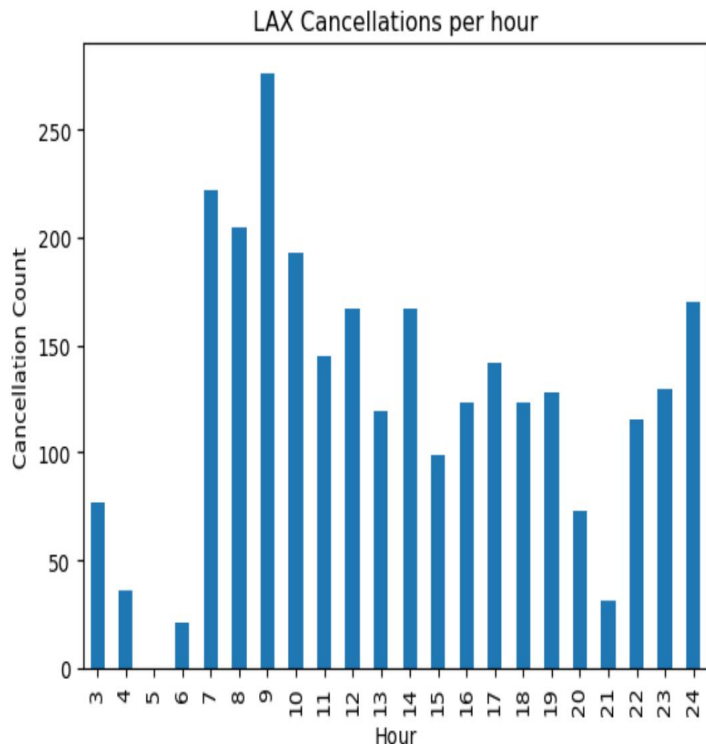

**LAX**

West Coast - Lots of International Flights

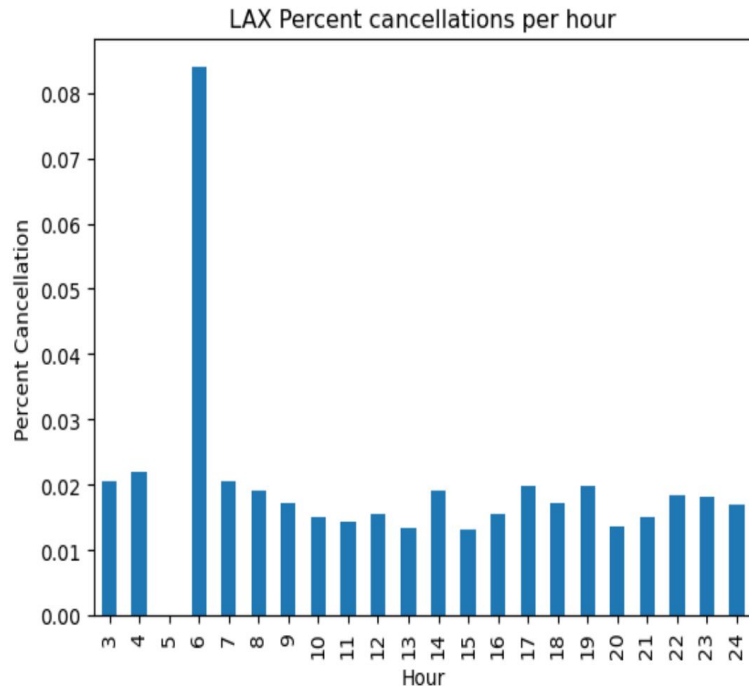

2nd busiest Airport in America! 66 Million Passengers in 2022

# Hourly Cancellations

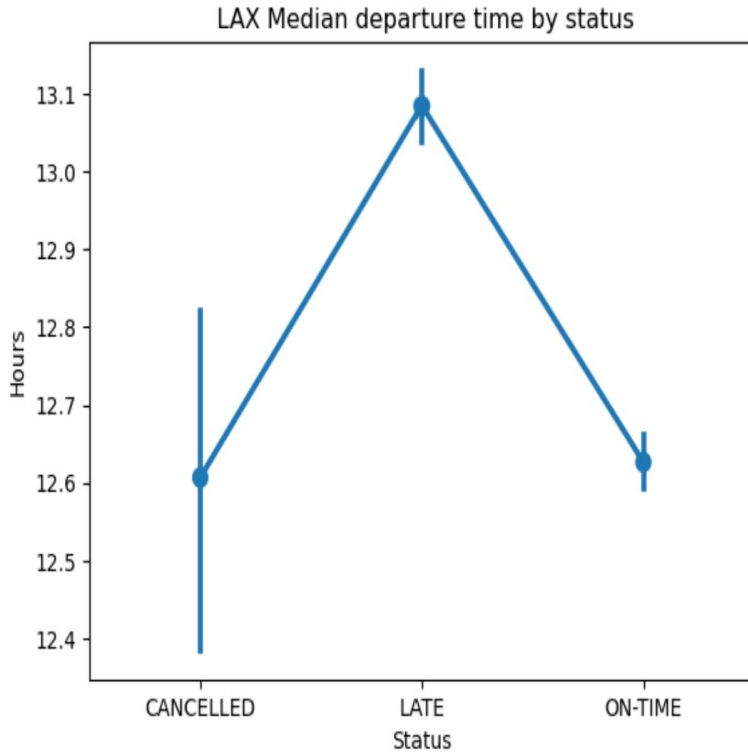

- Commercial Flights from 3 AM to 12 AM
- Peak Cancellation 9 AM and morning hours
- Low Early Hours Cancellation - fewer flights
- Pure numbers hard to interpret without percentage context
- Uptick around 10pm - end of day
- Middle Variability

# Percent Cancellations

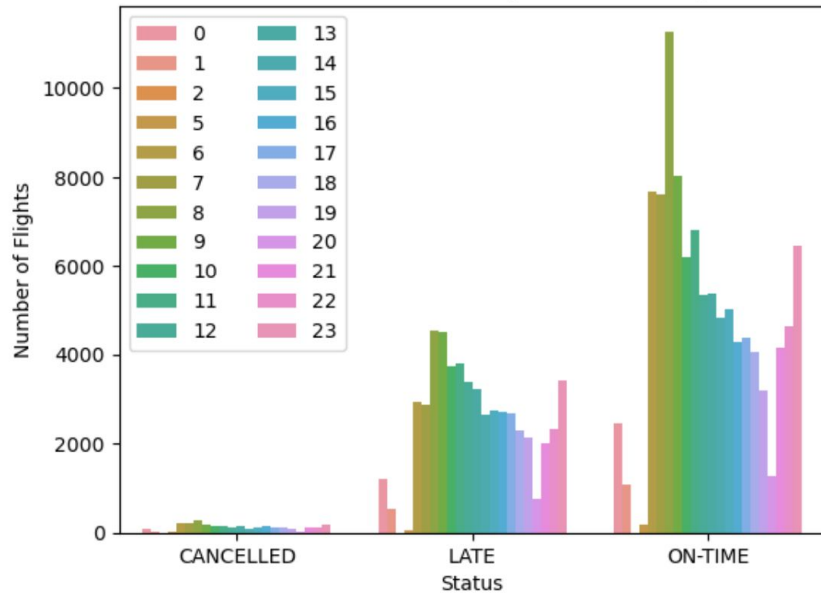

- Provides more context
- Don't Schedule a 6 AM Flight!
- Pretty Constant except 6 AM and 5 AM
- Few 5 AM Flights/None Cancelled

# Departure Time by Status

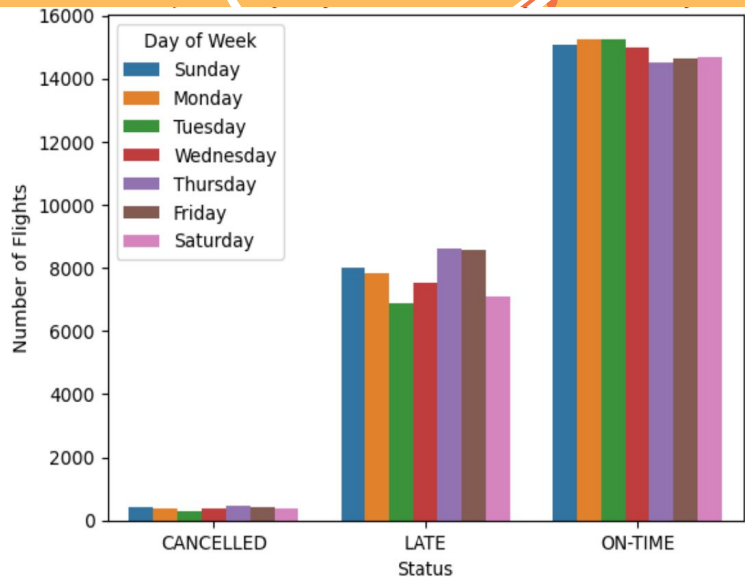

- Canceled Median 12.6
- Late Median 13.05 - Flights around 1pm
- More likely to Experience delays at 1pm
- On Time Median 12.8 suggesting earlier flights are more likely to leave on time

# LAX - Hourly Delay/Cancellation Analysis

- **Low Cancellations:** Cancellations are consistently low across all hours, indicating efficient scheduling or favorable conditions.
- **Midday Delay Peak:** Delays peak at 1 PM, suggesting congestion or operational challenges during midday.
- **High On-Time Mornings and Evenings:** On-time flights are most frequent in early mornings and evenings, reflecting robust airport operations during these times.
- **Operational Focus:** Insights suggest a need to focus on reducing midday delays for improved efficiency.
- **Late and On-Time Mimic each other** suggesting percentage analysis may be more useful

# LAX - Daily Delay/Cancellation Analysis

- **Weekly Flight Patterns:** Analysis of LAX flights shows status distribution by day—Cancelled, Late, On-Time.
- **Stable Cancellations:** Flight cancellations remain low across all days, indicating consistent operational control.
- **Late Flights Variation:** Late flights show moderate variation, with mid-week days experiencing slightly higher numbers.
- **Consistent On-Time Performance:** On-time flights maintain high and consistent numbers throughout the week.
- **Strategic Takeaway:** Data suggests reliable performance with room for targeted improvements in mid-week delay management.

# LAX - Overall Very Efficient!

- Optimize Midday Operations: Since delays peak at 1 PM, LAX could allocate additional resources during midday to handle operational bottlenecks.
- Enhance Mid-Week Scheduling: With a slight increase in late flights during the mid-week, LAX might consider redistributing or rescheduling some flights to less congested times.
- Maintain Morning Efficiency: Given the high volume of on-time flights in the early morning, maintaining current practices during these hours is crucial.

# Appendix

**LAX**

66 Million  
Passengers in 2022

**MIA**

50.5 Million  
Passengers 2022

**JFK**

55 Million  
Passengers 2022

# Lets Compare!

MIA Cancellations per hour

JFK Cancellations per hour

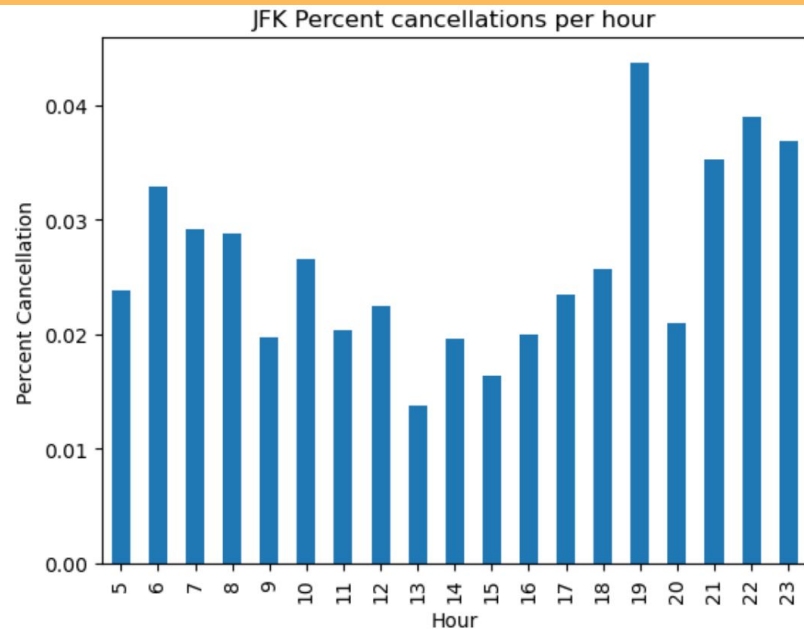

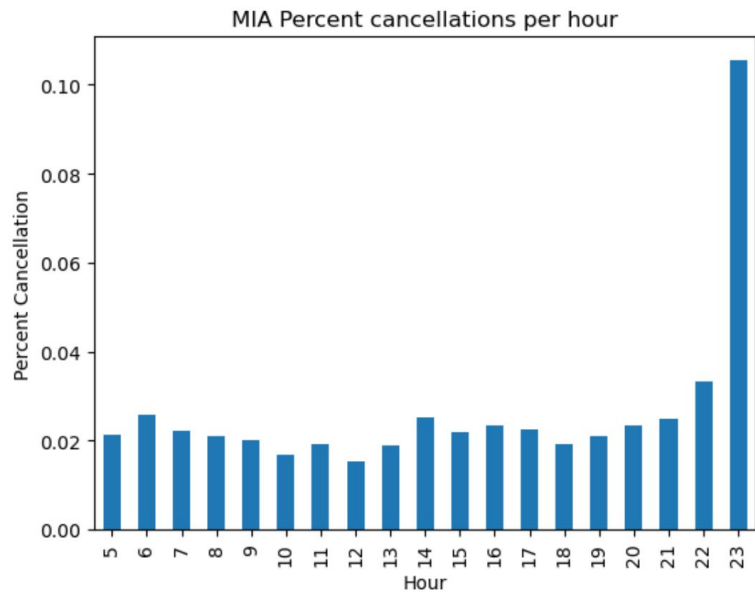

# Insights

- **Peak Cancellation Times Differ:** MIA's peak cancellations occur around 5 PM and 8 PM, while JFK's highest is at 9 AM.
- **Higher Volume at MIA:** MIA experiences a higher volume of cancellations overall, with its peak nearing 800 compared to JFK's peak at around 250.
- **Evening Cancellations at MIA:** MIA shows a significant peak in the evening not present at JFK, indicating potential operational or scheduling differences.
- **Morning Cancellations at JFK:** JFK has a pronounced cancellation peak in the morning, which MIA does not exhibit to the same extent.
- **Midday Patterns:** Both airports show a dip in cancellations during midday hours, suggesting a common period of lower cancellation activities.
- **Late Night Activity:** Cancellations at both airports drop off after 8 PM, indicating less scheduled flight activity or higher flight execution rates at night.

# Lets Compare!

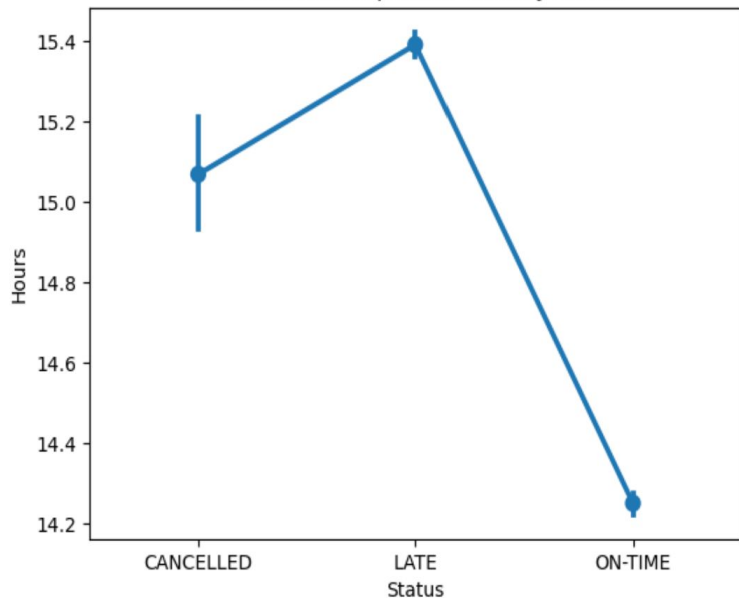

# Insights

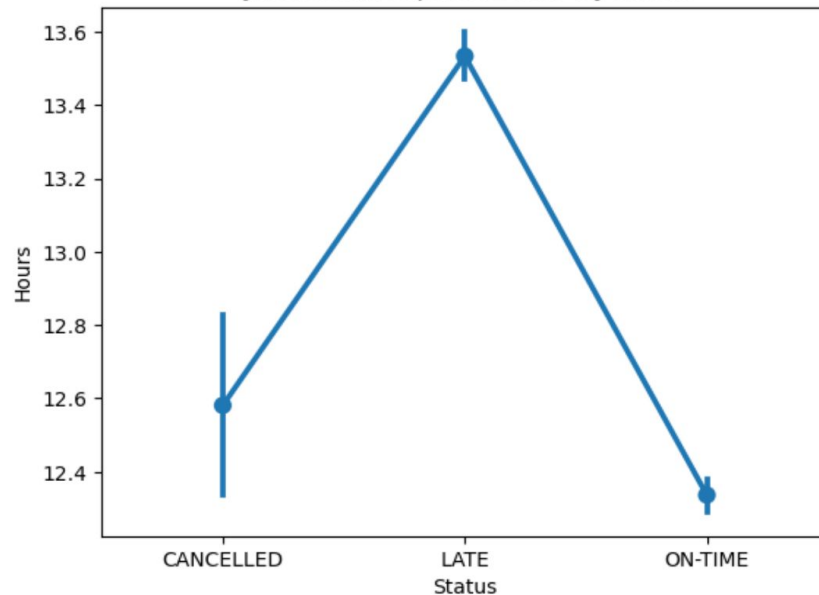

- **Cancellation Rates by Hour:** MIA shows a substantial spike in cancellation rates after 9 PM, while JFK experiences a more gradual increase throughout the afternoon to evening hours.
- **Evening Cancellations:** JFK has a higher percentage of cancellations in the evening, peaking around 9 PM.
- **Late Night Trends:** MIA's late-night cancellation rate spikes dramatically, suggesting operational issues or policy differences in handling late flights.
- **Afternoon Stability:** Both MIA and JFK have relatively stable cancellation rates during the afternoon hours before rising in the evening.
- **Early Morning Performance:** Cancellation rates are low for both airports in the early morning, indicating a strong start to daily operations.
- **JFK overall much Higher Cancellation Rates**

# Lets Compare!

MIA Median departure time by status

JFK Median departure time by status

# Insights

- **Median Departure Time for Cancelled Flights:** MIA's median time for cancelled flights is around 3 PM, while JFK's is around 1 PM.
- **Late Flights Peak Time:** Both MIA and JFK show the median departure time for late flights is in the afternoon, but MIA's peak is later, around 3 PM compared to JFK's peak at 1 PM.
- **On-Time Departure Consistency:** On-time flights at both airports have median departure times in the mid-afternoon, with MIA at about 3 PM and JFK slightly earlier.
- **Overall Time Frame:** MIA's overall median times for flight statuses span a narrower time frame in the afternoon, whereas JFK's spread across a broader part of the day.
- **Variability in Times:** Error bars indicate more variability in JFK's timings for late flights, suggesting a wider range of departure times.

# Insights

- **Higher Volume at MIA:** MIA handles a significantly higher volume of flights across all statuses compared to JFK.
- **Cancellation Patterns:** Both airports show low cancellation numbers, but JFK has a slight increase in the late evening.
- **Peak Delay Hours:** MIA experiences the most delays in the late afternoon to evening, while JFK's delays peak in the early evening.
- **On-Time Flights Distribution:** MIA's on-time flights are heavily concentrated in the early morning, whereas JFK has a more even distribution with a spike in the late evening.
- **Late Evening Trends:** Both airports show an increase in on-time flights during the late evening, indicating successful flight management despite potential delays earlier in the day.

# Lets Compare!

# Insights

- **Volume of Operations:** MIA shows a higher volume of flights in all statuses compared to JFK, with both airports experiencing the most on-time flights on Fridays.
- **Cancellation Trends:** Cancellations are relatively low for both airports throughout the week, with no significant spikes on any particular day.
- **Late Flights:** For both MIA and JFK, late flights are fairly consistent across the week, with a slight increase on Fridays.
- **Consistency in On-Time Flights:** On-time flights at MIA and JFK show consistency across the week, with Friday being the busiest day.
- **Weekend Comparisons:** The weekend (Saturday and Sunday) shows a lower number of flights for both airports, which correlates with fewer delays and cancellations.

# Conclusion

- **Delay Distribution:** While JFK has higher cancellations, its distribution of delays is more even, suggesting that when flights are not canceled, the airport manages delays throughout the day efficiently.
- **Operational Volume vs. Cancellation Impact:** Despite MIA's higher volume of flights, its cancellation rate is lower than JFK's, which could be seen as an indicator of MIA's resilience or more effective scheduling under pressure.
- **On-Time Performance:** Both airports perform well in terms of on-time departures, with MIA managing a greater number of on-time flights due to its larger scale of operations.
- **Efficiency Assessment:** Considering the complexity of airport operations, MIA's lower cancellation rate with a higher volume of flights could suggest a relative efficiency advantage. However, JFK's management of delays, outside of cancellations, also reflects operational competence.
